The amount of time a student spends on the internet has increased substantially over the last decade. It is estimated that the average university student spends six hours a week on the internet This study will investigate the ethical issues related to using the internet to the extent that most students are involved with at least some of these. This will include the following topics: academic honesty, plagiarism, intellectual property, research, the internet as a source of information, and plagiarism. Academic Integrity and Plagiarism Introduction: Some writers claim that the purpose of their writing is just to write and not for Academic honesty is the obligation to work honestly. It is very important that students be honest with themselves and with

others. There is a difference between cheating, plagiarism, cheating and other forms of academic dishonesty. Cheating and cheating in the strict sense means trying to gain an unfair advantage over other students through dishonest means. What is plagiarism? Plagiarism means taking someone else's work or ideas and passing them off as one's own. It may also be just repeating a portion of someone else's work or words. Plagiarism is easy to do and may not even be noticed by others. Academic dishonesty is a far more serious matter than plagiarism and cheating. It is the use of a work, idea, opinion, etc., as one's own when it is not. It is cheating when a student does not know the rules of academic honesty. This includes copying an entire paper from the internet or stealing from others. This may involve copying someone else's work word for word and presenting it as one's own. This may even include taking someone else's ideas, formulas or computer programs and passing them off as one's own. What is cheating? Cheating is a far more serious offense than plagiarism. Cheating is not plagiarizing when one is trying to gain a personal advantage by cheating. This may include taking an exam before the tests are given or taking a test for one's own grade, rather than one's classmates. Cheating also includes using academic resources and equipment without permission, including borrowing and using someone else's personal computer and/or modem. Cheating is one of the most serious crimes in a high school. Why do students cheat? The principal reason students cheat is to get a passing grade in a class. They may be 2edc1e01e8
